

Mission Critical Infrastructure Services – Health Care

Take a look within any health care facility and you'll see mechanical solutions at work—from comfort cooling/heating in the patients' rooms and electrical panels and medical gas piping in the ORs to mission critical cooling in the data center which serves as the organizations hub for all IT activity. If your health care organization is like many today, there's a good chance you need help to maintain your mission critical infrastructure and that's where GMS comes in.

At GMS, we understand that health care providers today face increasing pressures which go far beyond the demands of delivering quality patient care. They must outperform competitors, deliver patient satisfaction, address and take action on patient safety initiatives, meet compliance and security mandates—all while maximizing current investments and keeping costs and energy consumption down.

GMS allows you to:

- Turn to a proven partner with expertise in both health care and mechanical services and installation
- Start with plans to support and maintain your infrastructure
- Build a case for optimizing costs without compromising patient care
- Make energy efficiency and cost savings a top priority

If you're one of the people involved in planning for a new mechanical solution within a healthcare facility or maintaining existing ones, GMS delivers affordable services designed to help you meet the demands facing a dynamic industry:

Data center solutions:

- Supplemental computer room air conditioners (CRAC) units
- In-row cooling
- System monitoring and reporting
- Installation and factory warranty service on UPS systems
- Cooling contingency plans including additional redundancy, back-up generators and portable cooling for critical failures

Company Overview

Based in Annapolis MD, GMS maintains a leading position as a provider of mission-critical infrastructure solutions and services nationwide. Focusing on the supply, installation, testing and maintenance of industrial HVAC, mechanical, electrical and plumbing solutions, GMS specializes in commercial markets including health care, government and hospitality

Did you know?

GMS has been delivering quality HVAC, electrical, plumbing and mechanical infrastructure solutions since 1998.

Advantages of maintenance

- Systems and equipment last longer
- Fewer costly repairs
- Energy efficiency increases
- Healthy air quality
- EPA compliance
- Documented equipment history
- Up-to-date warranty documentation

Mission Critical Infrastructure Services – Health Care

Central plant solutions:

- Installation, service and maintenance of: chillers, boilers, water towers, turbines, compressors, etc.
- Pump calibration, balancing, maintenance and service
- Piping repairs
- Valve exercising
- R Stamp Welding – GMS holds a certification from the National Board of Boiler and Pressure Vessel Inspectors for the repair and/or alteration of boilers, pressure vessels and other pressure retaining items.

HVAC solutions:

- Installation, service and maintenance of air handling units, RTU's, hot water heaters and split systems
- Electrical and plumbing work related to the installation of HVAC systems
- Full service of HVAC systems and emergency 24x7x365 repair services to qualified customers
- Contingency plans including cooling, heating, power and water equipment rental
- UVDI lighting for air purification and to reduce energy and maintenance costs

Electrical solutions:

- Factory warranty maintenance on UPS systems including service, battery replacement and start-up
- Commercial generator installation and maintenance
- Energy saving upgrades to buildings and additions, e.g. LED exit lighting, occupancy sensors, electronic lamp ballast

Plumbing solutions:

- Backflow prevention testing, repairs and installation
- Drain cleaning
- Energy efficient system upgrades including: tank-less water heaters, low flush or no flush urinals

Medical Gases:

- Air compressors
- Vacuum pumps
- Emergency oxygen inlet boxes valves
- Medical gas piping equipment

Green Initiatives:

- Tank-less water heaters
- UVDI's ultraviolet light systems
- LED exit lighting and lighting upgrades
- Multi-function meters to monitor and transmit energy demand, consumption and peaking trends
- Occupancy sensors for lighting

Did you know?

In the event of mission critical equipment failure, it's vital to have a contingency plan for your site. GMS can assess and make recommendations to help keep your site running, even when your equipment fails.

Did you know?

Installing low flush toilets and urinals can reduce annual water costs by up to 88%? Or that tank-less water heaters can save up to 40-60% in water heating costs as opposed to older and more conventional water heating systems?

Benefits of GMS Service

- All mechanical infrastructure under one contract
- Email dispatch
- Priority response to all service requests
- Computerized service call tracking system
- Certified technicians with extensive factory training
- Technical support staff to help you
- Automatic PM visit scheduling
