

When your boiler stops—so does your business

The increased reliance on equipment for operations and income has made more equipment “mission-critical”. As a result, equipment breakdowns that interrupt operations often result in business income loss, or worse. Think about it. What would be the impact if the heat or hot water boilers your building depends on failed – especially if you’re in the health care or hospitality industries?

The primary reasons for failures are poor or non-existent water treatment and little or no preventive maintenance for the boilers. GMS provides service and central plant care with particular accent on preventative maintenance. Our team of fully qualified service technicians is able to provide the installation and essential aftercare needs of a wide variety of commercial / industrial type boilers and water heaters available on the market.

GMS Boiler Services and Solutions

- Turnkey installation of new equipment for high performance, low emissions and real energy optimization
- Refurbishment of existing equipment
- Preventive maintenance plans & 24 hr emergency repairs to ensure:
 - Greater savings
 - Increased safety
 - Better reliability
 - Longer service life
- R Stamp Welding – GMS holds a certification from the National Board of Boiler and Pressure Vessel Inspectors for the repair and/or alteration of boilers, pressure vessels and other pressure retaining items.

Why GMS?

- GMS has a proven track record in boiler installation and repair services.
- GMS has an experienced team of “fully tooled” technicians, highly valued by our customers for their skill levels, efficiency and expertise.
- GMS is reliable, honest and upfront with our pricing – no hidden costs.

Did you know?

GMS maintains a leading position as a provider of mission-critical infrastructure solutions and services nationwide.

Did you know?

GMS has been delivering quality HVAC, electrical, plumbing and mechanical infrastructure solutions since 1998.

Advantages of maintenance

- Systems and equipment last longer
- Fewer costly repairs
- Energy efficiency increases
- Healthy air quality
- EPA compliance
- Documented equipment history
- Up-to-date warranty documentation
